

Dräger X-plore® 3300/3500 Half Masks

Respiratory protection is a necessity for safe industrial work. When modern materials fuse with proven technology, the result is an air-purifying respirator that provides superior protection with maximum comfort.

Dräger X-plore half masks keep users safe from pollutants in a wide range of industrial applications. The "FlexiFit" head cradle is almost unnoticeable under a safety helmet and the innovative X-guided strap-system distributes weight evenly across the user's head. The X-plore's "swept-back" design allows for a perfect fit under welding shields and visors.

Dräger X-plore half masks are available in three sizes, ensuring a great fit for different

face types. Equipped with the safe and easy-to-use bayonet filter connection system, they are compatible with the extensive Dräger X-plore filter range.

The X-plore 3300 is a completely safe economical option while the X-plore 3500 boasts a body made of hypoallergenic "DrägerFlex" material and a drop-down harness that allows the mask to be removed from the face without removing head protection.

FEATURES & BENEFITS

"FlexiFit" head cradle	Provides an excellent fit for any head, even under safety helmets.
"Low profile" design	Ensures an optimal field of vision and provides optimal fit for use under protective visors.
Strap system	Innovative X-guided strap system ensures an even weight distribution.
Flexible nose section	Provides a secure seal in the most critical area and allows compatibility with safety glasses and goggles.
Bayonet connector	Facilitates easy and secure filter attachment.
Dräger X-plore® 3500:	
Mask body	Made of hypoallergenic silicone-free "DrägerFlex" material.
Drop-down harness	Allows the mask to be removed from face without removing safety helmet.

ST-957-2008

Dräger X-plore® 3300
The low-maintenance, economical half mask.

ST-718-2006

Dräger X-plore® 3500
The very comfortable and robust half mask for long-term demanding tasks.
