Dräger. Technology for Life®

Benefits

Document and archive

Using Dräger GasVision software, all datalogger results can be collected in one location. This provides safe, secure and easy access to the right data at any time. Moreover, the collected data and information can be evaluated using GasVision.

Individual configuration

Dräger offers software for the professional configuration and calibration of Dräger gas measuring devices. With CC Vision, it is possible to adjust some settings of the device, as required, and to calibrate the sensors.

Available for all Dräger devices

Dräger offers a complete software portfolio for the professional configuration, adjustment and calibration of Dräger portable gas measuring devices. As updates become available, the individual products can easily be updated via the Internet, provided the software is already installed and Windows 2000, XP or Vista is the operating system.

Data for compliance

The data provides assurance to the safety office, the quality group and regulatory agencies on good practices, employee welfare and the safe conduct of the business.

Related Products

ST-574-2005

Dräger E-Cal®

Check, control, and calibrate portable gas measuring devices at any time: Dräger E-Cal®, the automatic test and calibration station is made for it.

ST-740-2006

Dräger Bump Test Station

Easy-to-use, stand-alone, and flexible: With the Bump Test Station, function tests of gas detection and warning devices can be carried out easily and independently of the location.
