

Dräger FPS® 7000 SCBA Full Face Mask

Firefighting requires working under hazardous conditions with poor visibility. Designed to offer optimal visibility, the Dräger FPS 7000 full face mask sets new standards in terms of personal safety, protection and comfort. The popularity of this SCBA mask is due to a large, unobstructed field of vision and a very comfortable and secure fit, while reducing or eliminating fogging during use.

Benefits

180° field of vision offers unobstructed view

The Dräger FPS 7000 has a large distortion-free polycarbonate visor that gives you an exceptionally wide field of vision, even in the most challenging situations. To reduce or eliminate fogging of the lens, the innovative design provides an even distribution of air across the mask.

Secure and comfortable fit

At Dräger, we understand that faces come in different shapes and sizes—so we designed the FPS 7000 accordingly. The mask is available in three sizes and has a double-sealed body with triple-sealing edges to conform to the shape of the face. The mask comes in highly chemically resistant EPDM rubber with a hairnet that is designed to be donned and doffed quickly and easily.

Highly versatile mask supports multiple devices

Dräger's line of FPS 7000 full face masks are approved for use with the Dräger PSS® 7000 and PSS 5000 SCBA, and BG4 CCBA. As a result, each person only needs to be fit tested on one mask.

Seamless integration with communication systems

The Dräger FPS 7000 mask is designed to be integrated with the Dräger FPS-COM 5000 and FPS-COM 7000* communication systems. To offer the optimal solution for each communication need in the field, the mask can be tailored with the appropriate communication systems. Whether you need a voice amplifier, tactical radio interface or team communication, each can be directly integrated into the mask for easy use.

*Pending NFPA approval

D-1036-2015

Dräger PSS® 7000

Developed for first responders, the Dräger PSS 7000 breathing apparatus is a major milestone in Dräger's continuing development of breathing devices for the firefighter. Combining advanced ergonomics with a wide range of configurable options, the Dräger PSS 7000 provides the comfort and versatility to meet the demands of first responders whenever breathing protection is required.

D-1030-2015

Dräger PSS® 5000

The Dräger PSS 5000 SCBA is a high performance breathing apparatus for today's firefighters. Combining streamlined design for easy maintenance with a wide range of configurable options, the Dräger PSS 5000 provides the user with versatility to meet the demands of first responders whenever breathing protection is required.

D-2263-2010

Dräger PSS® 3000

One of the lightest self-contained breathing apparatus carrying systems to date, the Dräger PSS 3000 has the same advanced technology as our industry-leading short and extended duration professional breathing apparatus. This extremely durable carrying system features an innovative high strength carbon composite carrying frame which exhibits outstanding thermal, impact, and chemical resistance.

D-28800-2015

Dräger FPS® 7000 RP

The Dräger FPS 7000 with a Rebreather Push (RP) connection is the perfect complement to the Dräger PSS® BG 4 plus closed circuit breathing apparatus. Because the FPS 7000 RP with hydration provides a source of relief, it is the ideal choice for long-duration missions such as high-rise, subway or tunnel fires, mine rescue or hazmat incidents.

D-01400-2015

Dräger FPS®-COM 5000

Developed for use with the FPS 7000 full face mask, the FPS-COM 5000 is a fully integrated communication system for voice amplification that offers clear speech transmission to the surrounding environment, regardless how extreme the conditions.

D-1306-2015

Dräger FPS®-COM 7000*

The FPS-COM 7000 allows for hands-free communication between team members and enables communication with external radio units with the push of a button.

D-9942-2014_C550_3

Dräger Com-Control 550

This microphone/loudspeaker unit connects standard radios to the FPS®-COM 5000 and 7000 communication units and can also be used independently. For ease of use, there are two large push-to-talk buttons and a switch to transfer incoming signals to the speaker.
