### True North® Introduces New FRONTLINE™ Series of Wildland Fire Packs

True North® has created two innovative load-bearing wildland fire fighting packs, and one new hose pack. The designs of all three packs were created from scratch and offer tremendous advances in functionality while retaining durability.

## FRONTLINE DEFENDER™ PACK NFPA 1977

- New H-style harness
- Removable New Generation shelter case that can be rear mounted (*fits Standard and Large shelter*)
- Removable accessory pocket holds 1L water bottle
- Built-in covered fusee holder
- New MOLLE attachment system
- Built-in 3L Hydration System (*included*)
- Materials: 1000D Cordura®, Nylon Webbing, #10 YKK® Zipper, Nylon Hardware
- Weight: 2.5 LBS

**COMING APRIL 2016:** Everything about the Defender™ has been rethought and redesigned. The main challenge in the red-zone is heat stress, and this pack has been specifically designed to minimize heat stress by putting the hydration on the waist and leaving the back uncovered. New H-style harness for rock-solid load control and stability. True MOLLE attachment for all accessories.
